Web Announcement 116

Claims for Office-Administered Drugs

The federal Deficit Reduction Act (DRA) of 2005 includes a new provision requiring State Medicaid programs to collect National Drug Code (NDC) information on claims for drugs administered in an office setting. This requirement will facilitate Nevada Medicaid's recovery of drug manufacturer rebates. Please view the [attached letter](#) for further details, billing instructions and a short questionnaire. The letter was mailed to affected provider types.

Electronic submitters may refer to the updated Companion Guide titled "[Transaction 837P - Professional Health Care Claim and Encounter](#)" for the technical specifications required for this change.
